

Kirshan Chand

Data Scientist & Analyst | Python · SQL · Power BI · ML · NLP · Time Series

+1 (973) 462-3138 | kirshanchand@outlook.com | [LinkedIn](#) | [GitHub](#) | New Jersey, USA

PROFESSIONAL SUMMARY

Data Scientist and Analyst with 3+ years of hands-on experience in financial analytics and machine learning, currently completing an MS in Data Science at Drew University. Skilled in building NLP, time series, and classification models using Python, SQL, and Scikit-learn — with projects spanning 200K+ news headlines, DJIA forecasting, and credit risk prediction. Combines finance domain expertise with strong statistical foundations to deliver clear, actionable insights for non-technical stakeholders.

EDUCATION

Master of Science in Data Science

Drew University, Madison, NJ

Expected Dec 2026

Bachelor of Science in Business Administration – Finance

Greenwich University, Karachi, Pakistan

Sep 2023

TECHNICAL SKILLS

Programming & Libraries: Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly, Statsmodels), SQL

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Google Colab, AWS (S3, EC2)

Data Analysis & Visualization: Excel (Pivot Tables, VLOOKUP, Power Query), Power BI, EDA, Data Cleaning, Statistical Analysis, Hypothesis Testing, A/B Testing, Dashboard Design, KPI Reporting

Machine Learning: Scikit-learn, Logistic Regression, SVM, KNN, Decision Trees, Random Forest, XGBoost, Feature Engineering, Cross-validation, Hyperparameter Tuning, Time Series (SARIMA, Prophet), NLP (TF-IDF, t-SNE, BERT, XLNet, HuggingFace Transformers, HDBSCAN, Topic Modelling)

Business & Domain: Financial Analysis, Budgeting, Forecasting, Variance Analysis, Reporting Automation, Stakeholder Communication, Cross-functional Collaboration

PROJECTS

News Headline Analysis — Python, NLP, BERT, XLNet, Scikit-learn, TF-IDF, t-SNE

May 2026

- Developed an NLP-based ML model to classify 200,000+ news headlines into categories including politics, sports, health, and crime.
- Applied text preprocessing, TF-IDF vectorization, t-SNE visualization, and HDBSCAN clustering to identify hidden topic patterns across large-scale text data.

Built and evaluated NLP classification models including Logistic Regression, Random Forest, BERT, and XLNet to categorize 200K+ news headlines, achieving 80% accuracy and weighted F1-score of 0.79.

DJIA Time Series Forecasting — Python, SARIMA, Prophet, Pandas, Statsmodels

Apr 2026

- Analyzed 10+ years of DJIA financial market data (2,700+ records), performing stationarity testing, differencing, and ACF/PACF analysis to identify forecasting patterns.
- Developed and compared SARIMA and Prophet models; Prophet achieved RMSE of 1,519 and MAE of 1,283, outperforming SARIMA on long-range trend capture.
- Generated 30-day market trend projections and visual reports, supporting simulated investment decision analysis and financial planning scenarios.

Credit Risk & Loan Default Prediction — Python, Scikit-learn, Pandas, NumPy

Mar 2026

- Analyzed 390K+ loan records with 25+ features, handling 500+ missing values and engineering model-ready features from raw financial data.
- Built and evaluated Logistic Regression, SVM, and KNN classifiers — Logistic Regression achieved 85% accuracy with highest interpretability, recommended for production use.
- Identified top risk drivers (debt-to-income ratio, annual income, credit history) to improve borrower segmentation and support data-driven loan approval decisions.

Retail Sales Forecasting & Business Insights — Python, Scikit-learn, Pandas, Matplotlib

Sep 2025

- Analyzed 1,000+ retail transactions across 3 branches and 6 product lines to uncover customer behavior patterns and key revenue drivers.
- Built a Linear Regression model achieving $R^2 = 0.90$, with stakeholder-ready dashboards supporting inventory planning and business strategy.

PROFESSIONAL EXPERIENCE

Finance Analyst | Jeelani Industries — Karachi, Pakistan

Nov 2023 – Dec 2024

- Used Python, SQL, and Excel to analyze financial and operational data, automate monthly reports, and run variance analysis — reducing reporting time by 30%.
- Queried SQL databases to perform transaction-level analysis on trade and financial records, ensuring data accuracy and regulatory compliance.
- Built Power BI dashboards and financial reports to track KPIs, surface trends, and provide management with real-time data for informed operational decisions.

Finance Intern | Balaji Seed Corporation — Karachi, Pakistan

Jul 2023 – Sep 2023

- Analyzed seasonal financial data using SQL and Excel to identify budget trends and support procurement forecasting decisions.
- Built Excel dashboards (Pivot Tables, charts) to visualize department spending patterns, improving financial reporting speed and visibility for the team.

Founder & Finance Manager | TD Enterprise — Karachi, Pakistan

Sep 2018 – Aug 2022

- Used Excel, SQL, and Power BI to analyze pricing, track revenue, and manage budgets — growing client base by 30% and cutting delivery timelines by 25% through data-driven decisions.
- Built Power BI reports and dashboards to monitor business KPIs and revenue trends, turning raw data into clear insights that guided day-to-day business decisions.
